

Building the Leading Artificial Intelligence (AI) Ecosystem for the Frankfurt Rhein-Main Region

Frankfurt am Main, January 29, 2025 – The AI Hub Frankfurt Rhein-Main initiative has set out to strengthen and further develop the AI ecosystem in the Frankfurt Rhein-Main region. At the end of June 2023, AI Hub GmbH and AI Hub Ventures UG were officially founded. Both companies share the goal of establishing a leading AI ecosystem that fosters the dissemination and application of AI in the economy and society of the Frankfurt Rhein-Main region. Operated by AI Hub GmbH, the "AI Hub Frankfurt Rhein-Main" serves as a central point of contact for AI-related inquiries, addressing businesses, start-ups, investors, talents, and citizens in the region.

Through the AI Hub's initiatives, Frankfurt has witnessed the emergence of a remarkably strong AI community in recent months, comprising high-caliber members, including international technology firms such as Microsoft, Google, and HP.

Looking ahead, AI Hub Frankfurt has set ambitious goals and is focusing on five key areas to advance the development and application of AI in the region:

AI Events & Networking: AI Hub Frankfurt regularly organizes high-profile AI events such as the UAI Conference, UAI Start-up Night, UAI Talent Night, and the upcoming AI Week Frankfurt. These events bring together experts and AI enthusiasts, providing a platform for knowledge exchange, discussions on current developments, and fostering synergies between key players in the AI sector.

AI Start-ups & Innovation: AI Hub Frankfurt actively supports innovative AI start-ups by offering advisory services, mentoring programs, and access to an extensive network of investors and AI experts. This fosters the growth of promising start-ups and the development of pioneering technologies within the region.

AI Consulting & Support: AI Hub Frankfurt provides AI workshops and consulting services to regional companies, helping them identify use cases, implement AI technologies, and optimize business processes. The aim is to unlock the full potential of AI for businesses in the region, creating a competitive advantage.

AI Training & Education: AI Hub Frankfurt offers a wide range of training formats and educational programs to equip employees with the necessary expertise in AI applications. From AI keynote speeches to expert-level workshops, the offerings are highly diverse. Additionally, companies will soon be able to publish targeted job postings for AI professionals within the community, facilitating access to regional AI talent.

Public Engagement and Citizen Participation: In collaboration with the AI Frankfurt RheinMain e.V. association, AI Hub Frankfurt is committed to raising awareness and educating society on AI-related topics. Citizens are encouraged to actively participate in discussions and events to voice their concerns and contribute to developing solutions. This open dialogue aims to increase transparency regarding AI's opportunities and risks, foster knowledge sharing, and promote an open-minded attitude towards AI technology among the region's population.
