## Securing Global Partnerships with Three Overseas NDAs

Recently, Leadpoint System signed **Non-Disclosure Agreements (NDAs)** with three overseas partners, laying the foundation for deeper collaboration in **the Middle East, the United States, and Southeast Asia**. These agreements mark the start of active discussions around global partnerships and pilot projects, aligning with the worldwide push toward stablecoin adoption and regulation.

## A Complete Platform for Stablecoin Operations

At the heart of Leadpoint System's innovation is its proprietary blockchain mainnet, **Funet**, and its dedicated digital wallet, **F-One Wallet**.

The platform offers:

- **High-level security** through decentralized architecture and robust encryption
- **Scalability** to handle large-scale, high-frequency transactions
- **Operational efficiency** for enterprises and financial institutions

Through **SDK and API integration**, the system can be seamlessly connected to existing financial or corporate infrastructures. Real-time monitoring and on-chain audit trails ensure **regulatory compliance and transparent operations**.

## Responding to Evolving Regulatory Landscapes

In South Korea, discussions on **stablecoin legislation** are gaining momentum, while regulatory frameworks abroad are rapidly taking shape. Leadpoint System is actively adapting to these changes by:

- Co-designing business models with local partners
- Localizing services for specific markets
- Conducting regulatory compliance reviews

This proactive approach ensures the company can meet diverse jurisdictional requirements while maintaining operational agility.

## A Clear Vision for Global Growth

CEO DoHyoung Kim emphasized the company's commitment:

“With the NDAs in place, we are moving quickly toward live trials and joint ventures in the Middle East, the U.S., and Southeast Asia. Our goal is to turn our technical strengths into tangible market outcomes.”

Looking ahead, Leadpoint System will continue to build **secure, reliable digital asset infrastructure** — including stablecoins — on its own blockchain ecosystem, while steadily advancing its **global expansion strategy**.
